

Product Brochure

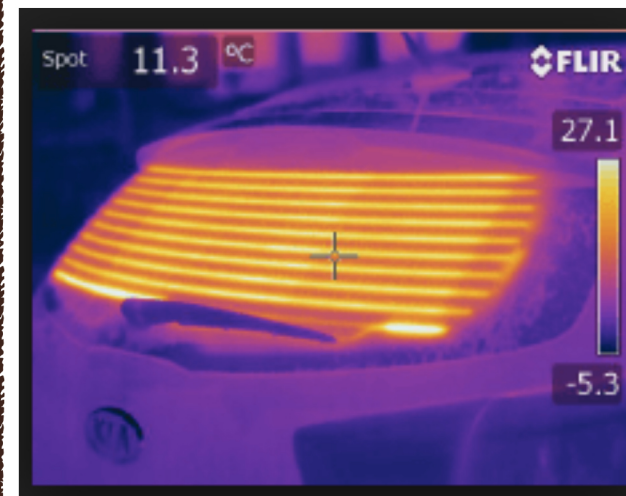

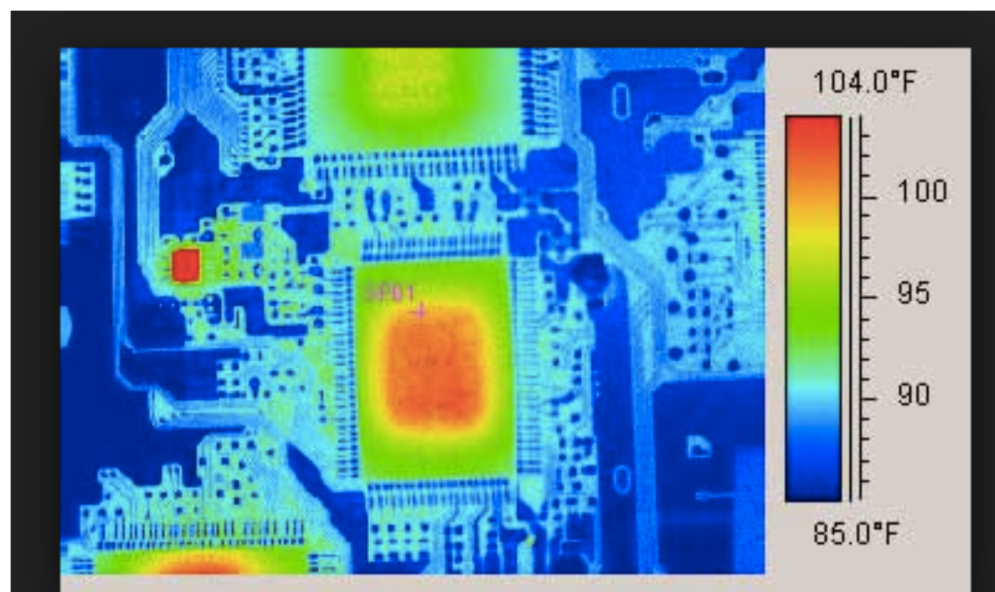

Automated Thermal Imaging & Automation

TECH VENTURES PVT.LTD.

Solution Brief —

The solution is aimed at addressing the critical nature of thermal process and systems. The IP thermal detectors are installed in fixed or movable type installations which keeps on tracking the temperature of critical nodes and provide necessary alarm and process control functions via artificial intelligence & application programmes.

The solutions are useful for inspection of critical nodes like substation equipments, coal-yard monitoring, Refractory & KLIN, Process monitoring and continues thermal testing in factory operation.

Automated CoalYard
thermal Monitor & cooling
system Adani Power
